

2018/03/02: Friday

1:23 PM: (01,02) FEC pressure steadily the wall transition.

1:36 PM: (03,04) FEC pressure low, ~50% increase time in hot cold mode.

1:43 PM: (05,06) FEC pressure low, slightly prefering hot mode.

1:51 PM: (07,08) FEC pressure low still, almost all ~~cold~~ ^{hot} mode on pedestal voltage.

2:02 PM: (09,10) FEC pressure low still. Totally ~~cold~~ ^{hot} mode.

2:09 PM: (11,12) FEC pressure raised, mostly cold-mode.
